

MANAV GUPTA

Backend / Software Engineering Intern

Java, Spring Boot, Python | [GitHub](#) | 4 Backend-focused academic projects | 200+ LeetCode problems

Ghaziabad, UP | manavgupta0808@gmail.com

EDUCATION

Chitkara University, Rajpura — B.E. in Computer Science & Engineering | **2023–2027**

CGPA: 9.08

TECHNICAL SKILLS

Languages: Java, Python, C, C++

Frameworks: Spring Boot, FastAPI, Flask

Backend & Databases: REST APIs, WebSockets, Redis, MySQL, PostgreSQL

Tools: Git, Docker, Linux, Maven, IntelliJ IDEA

Core Concepts: Data Structures, System Design, Networking, AI/ML

ACHIEVEMENTS

- Solved 200+ Data Structures & Algorithms problems on LeetCode.
- Scored 85.13 percentile in the eLitmus pH Test (quantitative, logical, and programming assessment).

SELECTED PROJECTS

Real-Time Chat System | *Java, Spring Boot, WebSockets, Redis, PostgreSQL*

- Built a multi-user real-time chat application with low-latency messaging using Spring Boot and WebSockets.
- Implemented chat rooms, user authentication, message persistence, and chat history retrieval with PostgreSQL.
- Integrated Redis pub/sub to support scalable message broadcasting across connected clients.

Inventory Management System | *Java, Spring Boot, MySQL*

- Developed a backend system to manage products, stock levels, and sales transactions through REST APIs.
- Used layered architecture (Controller–Service–DAO) to improve modularity, maintainability, and code structure.
- Built a simple web interface served through Spring Boot for day-to-day inventory operations.

Network Intrusion Detection System | *Python, Scapy, Scikit-learn, Flask*

- Built an ML-based intrusion detection system analyzing live network traffic using Scapy.
- Extracted protocol-level features and trained anomaly detection models using Scikit-learn.
- Developed a Flask-based dashboard to visualize real-time alerts, suspicious IPs, and traffic patterns.

Chess Tournament Manager | *Java, MVC Architecture, CSV Storage*

- Designed a Java MVC application for player registration, tournament creation, and match scheduling.
- Implemented CSV-based persistence with automatic player ID generation and player performance statistics.
- Structured the project for future extension to a GUI and migration to MySQL.
